

# Medieval Peasants

# Farming

- This picture shows that farming was extremely hard work.

- A lot of the farmers have hats on to protect them from the sun, this is because if you were pale you were considered very rich but if you were tanned people would instantly think you were a farmer.

This is a wealthy woman - she is very pale.

# More Farming

- Most people did farming as a job, it was very common if you were quite poor and didn't have much to live on.

- Only men did farming women would do worse jobs, it wasn't very nice being a woman in medieval times. The men are wearing dresses, this is for the same reason why they wear hats, to protect them from the sun.

# Harvesting

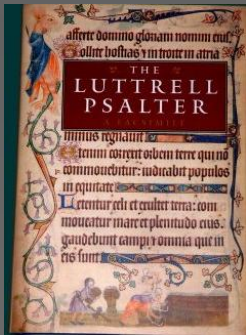

In this picture the people are putting down the seeds and the animals are pushing them into the soil with their hooves.

The animals are pushing the seeds into the soil.

# Thank you for watching

I got all my pictures from the Luttrell Psalter

This book shows all the different things people did in medieval times, some of the pictures can be quite strange.
